

No Project Is Too Small or Too Large.

Sherwood Solar Company, Inc. is here to assist you in the creation of the perfect solar system custom fit to your needs.

How would you like to eliminate your electric bill forever? Find out how SRECS (Solar Renewable Energy Certificates) from the State can help pay for your system's cost.

Let Sherwood help you take advantage of all the State & Federal incentives that are available today. We can take you through the whole process painlessly and help you design, set up, connect & maintain your system for many years to come.

Sherwood Solar Company, Inc guarantees our work & carry the maximum manufacturers' warranties for all the products we provide.

When you decide to go solar, you have made a major commitment to your future.

You need a reliable solar specialist that will be available & viable for all your future solar needs.

Our company has strong roots in the community & we have been a thriving electrical contractor for 65 years. For the last twenty years we have grown even more alongside the explosive growth of the solar industry.

When you choose Sherwood as your solar installer, you're assured that you are getting the experience & integrity that a project of this magnitude requires.

Company History & Solar Background

Sherwood Solar Company, Inc. had its proud beginnings in 1945, founded by a Charles Smith in Brigantine, NJ. In a struggling economy, Charles did business both locally and as far away as needed to keep the business going. To this day Sherwood still commutes to NJ's northern-most counties, all over Pennsylvania, Delaware & Maryland thanks to the business contacts & relationships that were fashioned years ago. Sherwood eventually set up shop just over the bridge in Galloway Township and continued with both residential & commercial electrical work, gradually adding solar projects to their repertoire as the demand slowly grew for the new green industry.

Charles was survived by 4 children, 2 of which continued the family business in the same reputable manner.

His son, Brian P. Smith, an involved valued Brigantine community member, & Charles' daughter, Maureen C. Leeds-Toner, an involved, valued Galloway Township member share the responsibilities of running the electrical firm with great success. Both Brian & Maureen learned the business from a very young age as Maureen learned the books & business dealings from her mother, Brian learned the trade out in the field & gained his electrical contractor license to survive that of his father's. Over the many years they both learned the value of an honest work ethic & the ability to survive in the most recessive of times. Although Maureen & Brian are the only related Sherwood members, there are others that bring quite a full plate to the Sherwood family table.

Gerard Reilly has shared his unique & extensive entrepreneurial skills both mechanically & business wise since 1984. As a former Merchant Marine & successful small businessman & farm owner, Gerard brings much diversity to the team.

Since 1991, Joel Sklarew brought his experience to Sherwood. He was a successful builder who partnered with his father, and specialized in custom single family home construction in North Jersey communities. His years of building homes from *soups-to-nuts* gave him vast knowledge of all construction trades (Electrician Licensed NJ, Philadelphia, Allentown, and Harrisburg, Pennsylvania), which lends him to be quite an asset on any job-site or in any situation. Also on staff, we pride ourselves in having our own knowledgeable solar system designer, William Toner, who works with the customer & the governmental agencies to ensure that all systems meet mandated State & Federal requirements.

As with any business, Sherwood evolved with the growth of technology & has always stayed current with every aspect of the electrical field — residential & commercial. With a long history of working with the larger builders, this attention to detail & efforts to stay current have been the mainstay to their continued success.

Company History & Solar Background (continued)

Sherwood's integrity has always governed their business practices as can be vouched for by any customer, business associate or local official. Brian & Maureen's commitment to excellence & to their own personal reputations carries them to the top in whatever they endeavor.

Although the solar industry may seem relatively new to most of us, it has been a thoroughly researched & studied area for Sherwood & their staff. Long-time valued associate, Gerard Reilly has been installing solar for twenty (20) years for Sherwood & other entities, and has shared his incredible knowledge & intelligence with our entire staff. It is in the last six (6) years that Sherwood began installations of the on-grid connected systems. It is because of recent State & Federal incentives coupled with the availability of affordable materials that has enabled this market to suddenly expand. It had to reach that financially obtainable status so that people like you and I could afford to finally become "green".

Sherwood Solar Company, Inc. Is proud to be a part of the solar solutions movement. Brian & Maureen & their devoted staff intend to follow the solar industry to each new level of its growth, committing to pride & excellence for at least another 65 years.
